

# Cetek Drive Replacement Panels

## PREVENT ENTRAPMENTS

When drives reach the end of their useful life they may become intermittent or they may fail completely, causing shutdowns and entrapments. Renew your equipment with a new replacement drive.

## NO LOSS OF PERFORMANCE

Cetek drive panels utilize industry standard elevator drives that go in quickly and can be easily tuned to meet the performance requirements needed for your equipment.

## NO RE-PROGRAMMING REQUIRED

Cetek Drive Replacement Panels are engineered to drop into existing MIPROM 21 control systems with no reprogramming required.

**Cetek Drive Panels – a cost effective option for replacing worn out obsolete drives on any Montgomery Miprom™ units you maintain.**

**Cetek can provide you with fully supported replacement choices.**

**Contact us for specific replacement information.**

**CETEK Inc  
2235 W 76<sup>th</sup> St  
Davenport, IA 52806**
